Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 14 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 14, the phrase "about 35 mm to about .3 mm to about 1.0 mm" is vague and indefinite because it is unclear what range the three values define.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Saukkonen et al, U.S. Patent No. 4883233, in view of Heymanns, U.S. Patent No. 4877196.

Referring to claims 1-3, 6, and 13, Saukkonen et al teach a reel-up winder with one or several members to support the reel to be formed onto a reel spool 31, of which member at least one support member is a set of belt rolls 20, which consists of a belt loop 15 which is supported by means of at least two rolls 12, 13, whose axes are substantially parallel to the axis of the reel spool, the outer face of the mantle of at least

Application/Control Number: 09/673,981

Art Unit: 3654

one roll being in nip contact with the reel to be formed in said set of belt rolls as shown in Fig. 1.

Saukkonen et al does not teach a substantially spiral-shaped groove pattern on the roll mantle.

Heymanns teaches a screwlike or helical configuration of the groove pattern on the rider roll as described in column 2, lines 18-23, and as shown in Fig. 1.

It would have been obvious to one of ordinary skilled in the art at the time the invention was made to modify the apparatus of Saukkonen et al and provide a spiral-shaped groove pattern on the roll to avoid air pockets between the material and the roll as taught by Heymanns to prevent wrinkles being formed on the materials during winding.

Referring to claims 4-5, 9-12, and 14-15, Heymanns teaches the grooves's width between 2 to 25 mm, and the depth from .1 to 3 mm as described in column 2, lines 23-31.

It would have been obvious to one of ordinary skilled in the art at the time the invention was made to modify the groove's width and depth to accommodate the invention as a choice of because the dimensions lacks any disclosed criticality.

Response to Arguments

Applicant's arguments with respect to claims 1-15 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 3654

Conclusion

Page 4

The prior art made of record and not relied upon is considered pertinent to

applicant's disclosure. The patents cited further show the state of the art with respect to

a reel up in general.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Sang Kim whose telephone number is (703) 305-3712.

The examiner can normally be reached Monday through Friday from 8:00 A.M. to 5:30

P.M. alternating Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Kathy Matecki can be reached on (703) 308-2688. The fax phone numbers

are (703) 308-0552 for regular communications and (703) 305-7687 for After Final

communications.

Any inquiry of a general nature or relating to the status of this application or

proceeding should be directed to the receptionist whose telephone number is (703) 308-

1113.
